

WHAT TO LOOK FOR IN A SINGAPORE MATH TRAINER

- Has your trainer taught Singapore Math (SM) in a *real* classroom to *real* students?
- Has your trainer taught SM in a variety of grade levels?
- Has your trainer taught SM to remedial, grade level, and honors students?
- Has your trainer taught SM as a core curriculum?
- Has your trainer used SM to raise the level of other math curricula?
- Does your trainer provide ongoing email support at *no additional charge?!*

All SMARTTrainers can answer yes to these questions!

TEACHER TRAINING IS THE KEY TO SUCCESS

The Singapore Math curriculum is now available in the United States. While this program can make all children successful, research shows that *teacher training* is the key to success.

SMARTTraining was founded by classroom teachers that teach using the core concepts and strategies utilized by Singapore Math. Additionally, SMARTTraining wrote the Singapore Math training manual approved by the California Department of Education.

SMARTTrainers have introduced Singapore Math to thousands of teachers, administrators, and parents, assisted over 300 schools internationally with successful implementations, and continue to provide many more with ongoing practical advice and coaching.

“ Our teachers wish the training for our reading program was this good! ”

SERVICES

Your complete resource for Singapore Math training!

SMARTTraining
Singapore Math, the Singapore Way!

WHAT IS SINGAPORE MATH?

- Promotes *MASTERY* of key concepts - builds upon preceding levels, assuming what was taught does not need to be retaught.
- Creates a true awareness of number sense, with an in-depth understanding of place value.
- Both teachers and students learn the *WHY* as well as the how of mathematics.
- Singapore Math introduces algebraic thinking in the first grade.
- Progresses from the use of manipulatives, to a unique pictorial stage, and then advancing to the abstract.
- Differentiation can be used within the classroom - challenging quick learners and supporting struggling learners.

Learn why Singapore Math is the right approach for you and your students!

SMARTTraining OFFERS THE FOLLOWING PROGRAMS:

Survey of Singapore Math

Discover what all of the fuss is about! This one-day overview of the curriculum explains the philosophy, as well as including techniques on mental math, problem solving strategies, manipulative skills, assessment, and differentiated instruction.

Math Content for K-6

Develop a profound understanding of fundamental mathematics. Many teachers don't feel as confident teaching math as they do language arts. This one-day class is designed to prepare teachers to explain why the rules of arithmetic work.

Pre-Implementation Training

Create a successful transition. This program includes everything from Survey of Singapore Math (see course description), plus grade specific training and/or Math Content for K-6 (see course description). Can be two or three days - three days is *highly* recommended.

Enhancement

Strengthen your teachers' confidence! This one or two-day program meets your specific needs. Trainers can co-teach your classes, debrief, observe, and critique. This is most effective about 3 months after implementation. Through experience, we believe enhancement supports teachers and leads to optimal results. *30% discount* when booked with three-day Pre-Implementation Training!

Parent Night

Use our experience to the fullest. This is a night where we answer questions from parents and help to develop the needed home support for a successful implementation. *Free* with Enhancement!

Model Lessons

Observe our trainers teach model lessons at any grade level (K-6), showing teachers what an ideal Singapore Math lesson looks like.

Model Drawing

Unlock the power of the Model Drawing Method to solve word problems in 3rd grade through pre-algebra.

Math Games and Manipulatives K-2

Build excitement with fun math games and use manipulatives to help develop that deep understanding of mathematics.

Webinars

Save on travel expenses and connect with SMARTTrainers online to meet your school's personal training requirements.

Annual Contract

Combine all of the above services and make trainers available to your school on a regular basis throughout the year. SMARTTraining can customize this partnership to meet the needs of your teachers.

“ [SMARTTraining] helped build my confidence and relax my math anxiety! ”

- Laurie Griffin
